What are REPUBLIC STEEL

DRUM RACKS?

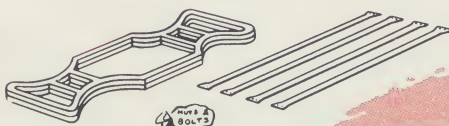

They are steel cradles each of which support two loaded drums securely and permit orderly stacking of pairs of drums to any practical height.

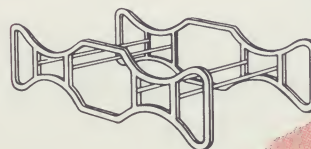

U. S. Patent No. 3019916

Quick Facts about DRUM RACKS

- Heavy gage channel steel, strongly braced and welded.
- Enormously strong.
- Painted to resist rusting.
- Shipped knocked down flat in carton—stores in small space—easily and quickly assembled.
- Net weight of unit only 35 1/2 lbs.

KNOCKED DOWN

ASSEMBLED

What **DRUM RACKS** Do for You . . .

1. They provide the quickest, safest and easiest method of moving and handling loaded steel drums ever devised.

2. They make it possible to store more in-use drums in less space than ever before.

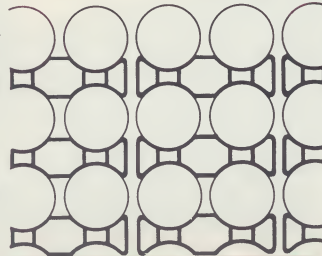

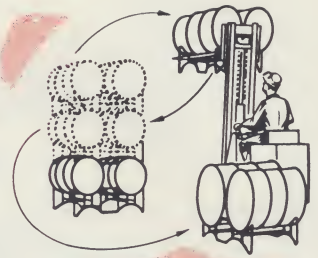

3. Handling and storage of drums is safer and they are less liable to damage.

4. This handling and storage method gives complete flexibility, as any individual pair

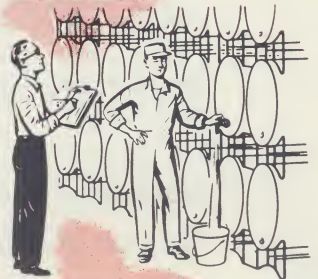

of drums can readily be removed without excessive handling of the other drums.

5. Efficient inventory control is easier to maintain with this orderly and accessible storage method.

6. Access for draw-off from bunged drums is easy.

7. Storing drums horizontally instead of upright eliminates collection of water and dirt around openings.

HOW DRUM RACKS WILL *Save You Money*

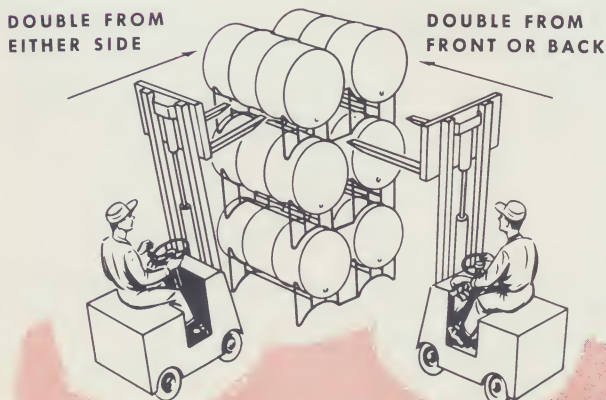

More in-use drums can be accommodated in less floor space than ever before. This means the release of many square feet of valuable floor space that can be used more productively and profitably.

Never before has it been so easy to move loaded drums with standard equipment. There is no need to invest in special drum handling equipment. With Drum racks, any standard fork-lift truck can pick up, move and stack as many tiers of drums at one time as its lifting capacity permits.

Drum racks actually protect drums from damage. Fewer dented drums to replace or punctured drums with loss of contents.

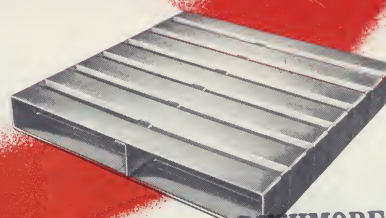

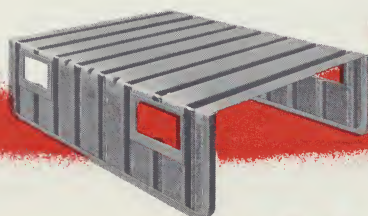

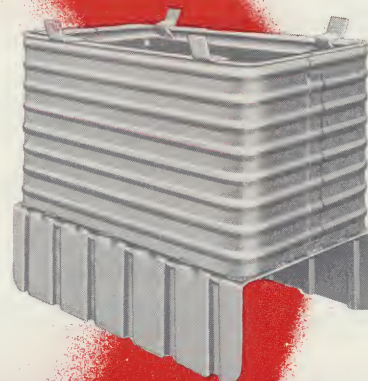

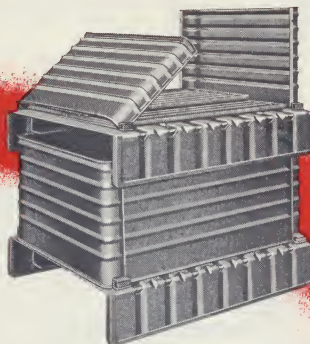

HANDLING METHODS

Republic Drum racks are designed for ease of handling and stacking with standard fork-lift trucks. As shown in the illustration, a two drum lift can be made from either front, back or both sides. As many pairs of drums can safely be handled at one time as the equipment can lift.

Other REPUBLIC MATERIAL HANDLING EQUIPMENT

Republic Steel Corporation is one of the largest producers of corrugated steel boxes, skids, box and skid combinations, pallets, and collapsible boxes. Standard sizes or special sizes and types to meet your specific needs. Write for Catalog M-106
